

Name: _____
 Tangent/Secant Segments

Date: _____ Period: _____

Tangent/Secant Segments

1. \overline{AB} and \overline{BC} are tangents. Find the value of x .

2. \overline{AB} , \overline{BC} , and \overline{AC} are tangents. $AB = 16$, $AC = 16$, and $AD = 6$. Find \overline{BC} .

3. Given circle O, \overline{AB} , \overline{BC} , and \overline{AC} are tangents. If $BC=20$, $BD=8$, find CD .

4. Secants \overline{BP} and \overline{DP} meet at point P. If $PA=5$, $AB=15$, and $PD=25$, find the measure of CD .

5. Secants \overline{PB} and \overline{PD} meet at P. If $PA=5$, $PB=15$, and $PD=25$, find the measure of CD .

6. \overline{PA} is tangent. $PB=4$ and $BC=5$. What is the measure of PA ?

7. \overline{PA} is a tangent. $PA = 8$ and $BC = 12$. What is the value of PC ?
