

Vocabulary Units 1-5 Project

Instructions

For this project I'd like you to choose 20 out of the 100 total words in units 1-5 of your vocabulary workbook.

You will then find or create a visual representation of each word, and put the visuals together in a collage or narrative. You've already come to know the definition of each word; now you're going to discover. Interpret and render what each word looks like.

Expectations

As with past projects, how you put this all together and present it is largely up to you. However, bear in mind: creativity and inventiveness will be a significant component of the grade (which also, obviously, includes appropriate understanding and depiction of the meaning of each word). So, simply Googling "meticulous," printing out some stock image and gluing it to poster board will not merit a particularly high grade. Effort must always be exceedingly evident. There are many ways to go about this; please explore all options.

Hint for an even better project: Consider some of the commonality amongst the various words, and construct the project according to a common theme. Or, consider some of the works of literature and ideas we've looked at this year, and construct your project according to that.

Logistics

Format: The project may be physical or digital.

Worth: 100 Points

Due: No later than Wednesday, 8 January.
