Helping people communicate within the family room, classroom or boardroom

Education is not something limited to the walls of a classroom...we are consistently learning. Each moment and each interaction has the potential to reinforce a prior learned idea or create a new schema. Our sessions help people to be open to learning about themselves and the people in their work environments, homes and communities.

Parent Workshop: Understanding the Adolescent Brain

“this session is not suitable for children”

Presenter: Terence Houlihan

When: Wednesday, November 17, 2021 @ 7:00 PM

Where: St. Francis Preparatory School – Br. Ralph Clifford, OSF Memorial Auditorium

RSVP by November 10, 2021 to https://forms.gle/YtLeYuFg1XXJbZxM7

Individuals will be required to show proof of at least one vaccine dose or a negative COVID-19 test within 24 hrs of this workshop

“I’d convinced myself that no presenter could fill 120 minutes with valuable content in an engaging format... Alas! It can be done. Not only did I feel happily through your two hours, I probably would have stayed for a third, had it been an option. Although I’m pretty caught up on a lot of the brain science, I really appreciated the way you put the information together in a way that feels very applicable and therefore ‘now’.”

- LH school counselor, Kingston, Jamaica
